

## Quest Feature List

3C's *Quest* is the only online assessment system with **developmentally appropriate** user interfaces (UI) for teens, adults, **and** children. *Quest*'s built-in accommodations enable you to collect high-quality data with children as young as 5 years, providing an unprecedented opportunity to give children a voice in clinical, social, and behavioral research.

*Quest* empowers Administrative Users to execute **all** aspects of data collection, from survey creation to deployment to data export, and offers an array of options to support research efforts, such as automated reminder messaging, incentive tracking, and more.

### □ Team Management

- **Account control** – add, edit, and delete admin users as needed
- **Manage projects** – organize surveys into projects for easy management by teams
- **Build surveys together** – share survey templates, audiovisual assets, and data codebooks with other team members
- **View results together** – share progress and data dashboards across team members

### □ Security & Access Features

- **Advanced permissions** – restrict access to identifying information to only those with pre-approved permission
- **Electronic signature** – collect consent and other specified agreements from respondents electronically via checkbox option
- **Password protected** surveys
- **Inactivity timer** – automatically log out after a pre-specified time of inactivity

### □ Survey Builder: *Basic*

- **Survey starters** – start from a saved survey or survey template
- **All essential question types** – multiple choice, select all, slider, open-ended, date, matrix, and dynamic user-added choices
- **Developmental accommodations** – masking, synchronized highlighting, and audio auto-play of instructions, questions, and/or response choices (see <https://core.quest4data.com/respond/core>)
- **Custom response choice formatting** – radio button, checkbox, button, dropdown, image (vertical or horizontal displays)
- **Multi-media (images, audio, video)** question content and/or response choices
- **Question & survey logic** – skip and branch based on responses
- **Answer piping** – personalize subsequent questions based on prior responses
- **Multiple language** support
- **Question & survey logic** – skip and branch based on responses
- **Audio links** – link text to audio files for read aloud of instructions, questions, and/or response choices
- **Preview** for mobile, tablet, and desktop display

### □ Survey Builder: *Premium Functions*

- **Text-to-Speech** for instructions, questions, and/or response choices
- **Drag & Drop question type** for categorization
- Interactive **multi-media menus and lists**
- **Mini-games** – include brief, fun mini-games as breaks and rewards for respondents

## Quest Feature List continued...

### □ Customized Look

- Custom labeling, titles, & tool tips
- Text formatting
- Add your logo
- Custom themes and colors
- Custom URL
- Tool tips – provide guidance, definitions, and tips to simplify on-screen text
- Display custom survey completion, thank you, or send respondents to a URL

### □ Customized Respondent Experience

- Required response designation
- Progress bar displays
- Response validation with custom error message
- Randomize items – present questions in random order or choose questions randomly
- Allow or restrict editing of responses after submitting
- Personalized feedback for response choices (reinforcement or corrective)

### □ Respondent Management: Basic

- Deploy surveys **anonymously** or to a known list of respondents
- Bulk upload respondent lists
- Set response quotas – define target & max number of respondents
- Set survey open & close dates
- Track survey completion in real-time, including respondents' first and last logins
- Receive alerts (such as on respondent completion, when target met)

### □ Respondent Management: Premium

- Random assignment – randomize respondents to different groups based on survey responses
- Assign different surveys to different groups of respondents
- Recurring surveys to collect data from the same respondents over time
- Custom email and SMS messaging
- Schedule delivery of messages (such as on completion, not started by date)

### □ Analysis & Reporting: Basic

- Response data – sort/filter tabular data displays for real-time results
- Timing data – automatic calculation of time spent completing each question and the entire survey
- Customize display of missing values
- Visualize data using default settings
- Print tables and graphs as PDF
- Download data as CSV

### □ Analysis & Reporting: Premium

- Custom variables – recode question responses into a new variable
- Codebook – customize variable names & labels, recode values, and tag identifying data
- Formulas – create a new variable that sums or averages across multiple questions
- Visualize data across all or sub-sets of respondents
- Queries – create queries to generate custom tabular and graphical displays of results

### □ Support: Basic

- Email and phone support
- Embedded tool tips
- Recorded live training via Zoom

### □ Support: Premium

- Live Chat function, if desired
- Customer Success Manager for technical consultation

Analysis & Reporting Basics	☑	☑
Analysis & Reporting Premium Features		☑

Your *Quest* application can be further customized to fit your organization's needs. For example, Premium license holders can increase any *Quest* feature, such as the number of SMS messages allowed or the cap on number of respondents. Premium license holders can also include custom dynamic data dashboards and custom graphical reports, as desired.

**Contact us for a quote, or to learn more.**

<sup>1</sup> The annual fee can be broken into (a) two payments of \$3,150 each or (b) four payments of \$1,650 each, if needed.

<sup>2</sup> The annual fee can be broken into (a) two payments of \$7,875 each or (b) four payments of \$4,125 each, if needed.

<sup>3</sup> **Respondent** = person completing one or more survey items. If the same person completes survey item(s) at multiple time points, the number of Respondents is incrementally increased (e.g., person completes the same survey at 3 time points equates to 3 "Respondents").
